SYNERGISTIC EMERGENCE IN THE 21ST CENTURY

Future Looking Back to Now

IT IS ON OUR SHOULDERS TO CREATE THE FUTURE.

Nobody's going to do it for us. And my own greatest passion is for helping people to awaken to this urgency within themselves. We have to take responsibility for it in the biggest way. Why? Because as a race we are at a very delicate, dangerous and exciting time in our evolutionary development. We are between stages.

Those of us at the leading edge have transcended the old but we have not yet created the new. We actually need to create the next philosophical, spiritual, moral, and ethical context for our own lives.

And this evolution cannot happen in any other way than through us. That is the awe-inspiring truth of what it means to be a human being in our time. -Andrew Cohen, 2003

PNE CONTEXTUAL STATEMENT

200 years from now, we at Paradigm Nouveau Enterprises see a world that is environmentally balanced and economically thriving. We look back from 200 years hence to the present day; *thus, our perspective is based from the future.* From this stand, trim tabs and tipping points are isolated and acted on, creating a foundation for human society where every global citizen has the same rights for health, wealth and freedom, as well as unlimited opportunity.

Below is a simple example or model of a potential future looking back to now ...

‡ The context of our definition of CIRCLE comes from the [World Council of Elders](#) and the elders' understanding of periods of time for humanity. Their current message indicates that humanity is about to complete its 3rd circle of time and space; however, the 4th circle has not yet been created. The progression of development between the 3rd and 4th circle is not linear. Moving from the 3rd to the 4th will be expressed in a transformation of the ground of being for humanity.

● This represents the **state change** or transformation between the first 3 CIRCLES and the 4th CIRCLE. In order to successfully address **global warming and climate change**, an unprecedented alignment of humanity occurred, creating an **ideal condition that allowed for the required state change**.

Ÿ The term **state change** as it is used in this model is similar to the state change that occurs when boiling water (a liquid) transforms into steam (a gas). The elements are the same but the characteristics and behavior have shifted from operating 2 dimensionally to operating 3 dimensionally. Hence a new dimension is brought into being ... there's been a change in state.

Era I - Era of Destabilization/Stabilization

History of humanity to 2006 - 2012*

-From 2006 - 2012*, THE crucial and pivotal opportunity for the evolution of human beings.

This was the TIME of the greatest shift humanity has ever known. A STATE CHANGE WAS REQUIRED.

Destabilization of the planet started about 11,000 years ago, when nomadic hunters first began farming, planting the seeds of future destabilization. The emergence of civilization about 5,000 years ago accelerated this process, particularly in the last half of the 20th century.

The climate for humans radically changed in all respects - economically, environmentally, socially, politically, etc.

* This date coincided with the date by which the Kyoto protocol (the UN-sponsored treaty on global warming) countries needed to begin meeting CO2 reduction targets.

Δ CLIMATE CHANGE AND THE FOCUS OF CO2 REDUCTION was the catalyst needed to shift the mindset/worldview/state of being from an "USvs.THEM" to a "WE." Δ

State Change Has Begun ...

Era II - Era of Recovery and Coping

-2012 - 2030

-From approximately 2012 - 2030, we entered into a vital transition time similar to the time before birth.

Humanity entered a vital and challenging transition time as old fragmented systems collapsed and new whole systems were designed to deal with the issues inherited.

A dominant issue was the emotional and psychological distress that had been building for generations, which created an unstable foundation to deal with the changes. Ignored issues such as addiction and denial (all forms, including individual, community-based and global) needed to be faced and dealt with head on. The planet and its inhabitants confronted a warmer climate and needed to cope with and adapt to the environmental fallout. This was a time where everything was brought to the surface, thus making it seem that "everything was worse than in the past."

Humans generated for themselves a newfound resolve and strength.

... State Change Is Complete

Era III - Era of Reinventing and Renewal

-2030 - 2130

-From approximately 2030 - 2130, a century of the most significant growth and development in our history.

Once the State change was complete, humans still were dealing with environmental fallout and societal reorganization, but naturally began thinking in whole systems. Children were understood as the future and their education became contextual in nature, creating individuals who could think for themselves by inventing and embracing their new "whole systems" worldview. This whole system mindset allowed for 'differences' without conflict, hence radically new forms of governance and public service. The notion of scarcity became obsolete. Energy approaches were based on clean, abundant supplies originating from sun and wind among others. Communities were viewed as living organisms, employing biomimicry as much as possible. Art, in all

forms, was central to the renewal process, continually giving inspiration and allowing for the healing needed. Physical and emotional diseases/disorders started disappearing as an expression of balanced lifestyles that were in a synergistic relationship with the planet.

There was a profound level of well-being for all life never before seen.

Era IV - Era of Refinement

~2130 - 2206 and beyond

-From approximately 2130 - 2206 and beyond --

All forms of energy, art, spirituality, education, government, business, etc., operate within a "whole" dynamic. Each form has a new name which reflects an unprecedented simplicity and elegance.

Human survival is no longer the question. The focus is refinement and the highest expression of beauty in all areas -- life as an art form rather than life as survival of the fittest.

The true promise for the fulfillment of what it means to be a human being is realized.
