SYNERGISTIC EMERGENCE IN THE 21ST CENTURY

# Global Conversations

January/February 2007

## Report from the Field – *Conversations with Africa*

**Dear Karambu (Karambu Ringera** (left) with Gladys, an IPI recipient, and two children, including Gladys' youngest child. Summer, 2006.):

Thank you for your warm and heartfelt communication. Authenticity and directness are approaches that always work with me.

Really, what it is that we are investing in ... is YOU. Karambu, I see a great woman in you whose ability both as a leader and woman can change the face of Africa for the better.

The overall condition for women in Africa, including AIDS, is devastating. Yes, we need to take care of one person at a time, but this will not change the condition. What needs to be thought about, created and delivered is a new paradigm/a new future for Africa. The predictable one is on a path of destruction.

Conversations for Africa's new future need to be engaged. We need to create the next space for Africa to evolve into, otherwise the condition will continue to implode.

This is thinking that is "outside the box" ... I know you are gifted with the ability to think and act in new ways. I am your partner as a woman and a lover of people in generating a possibility for Africa that not only saves lives but gives a richer, more vital and happier future for all Africa.

Never underestimate the power of taking one-hell-of-a stand. I'm always at your service.

Namaste,

Audrey
